Page 25 SERVICE MANUAL NUMBER 24 GENERAL INFORMATION For best speed and minimum spray, the corner between the bottom and the transom should be sharp. 72003 Bottom Corner Transom The bottom is referred to as having a “hook” if it is concave in the fore-and-aft direction. A hook causes more lift on the bottom near the transom and forces the bow to drop.

Re: MerCruiser Service Manual 25 First, start a new folder on your desktop, and name it something you want. I use Manual 25. When the link first opens save it to the above folder. Then, click the red box (with Marine engines in it) which will take you to the outline. Then start with section 4A and download (and save) each section to that folder.
